

SUMMARY

Statistics Canada releases labour market data for college and university graduates on November 5, 2020

Statistics Canada (Statscan) recently released the report **Labour market outcomes for college and university graduates, 2010 to 2016**. This report includes information on the median employment income by educational qualification, field of study, age group, gender, and status of student in Canada—for Canada, the provinces and the territories. The data used for the calculation of graduate outcome indicators are derived from the [Postsecondary Student Information System](#) integrated with the [T1 Family File](#).

Statscan has created a helpful **Data Visualization Tool** that allows you to sort on the criteria noted above: <https://www150.statcan.gc.ca/n1/pub/71-607-x/71-607-x2019031-eng.htm>
